SUMMARY

Full Stack Software Engineer with 2+ years of experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, and REST APIs. Experienced in backend architecture, secure authentication, and real-time systems, with a strong focus on writing clean, maintainable, and production-ready code.

EDUCATION

- University of South Asia** Oct 2021 - Jun 2025
Bachelor of Computer Science
Coursework: Artificial Intelligence, Data Science, Web Programming, Software Design and Analysis and Advanced Database
FAST - National University of Computer and Emerging Sciences
Master of Computer Science (CourseWorkDone) Aug 2025 - Oct 2027

EXPERIENCE

- Full Stack Developer – ForthLogic (Remote)** Apr 2026 - Present
MERN Stack (MongoDB, Express.js, React.js, Node.js), JavaScript, REST APIs, JWT, WebSockets
 - Developing scalable backend services for Chatley.ai, an AI-powered real-time communication platform.
 - Designing and implementing secure RESTful APIs using Express.js and Node.js.
 - Building real-time messaging features using WebSockets for low-latency communication.
 - Implementing JWT authentication and authorization for secure user management.
 - Designing optimized MongoDB schemas to improve application performance.
 - Collaborating with frontend developers using React.js in Agile development workflows.
 - Participating in code reviews, debugging, and feature deployments.
- Associate Software Engineer – TechClan** Aug 2025 - Sep 2026
JWT, JavaScript, Nodejs, Reactjs
 - Developed scalable backend services using Node.js and Express.js.
 - Built secure authentication systems using JWT.
 - Designed and optimized RESTful APIs for improved performance.
 - Enhanced PostgreSQL performance through indexing and query optimization.
 - Collaborated with cross-functional teams using Agile methodologies.
 - Participated in production deployments and code reviews.
- Associate Software Engineer – ECOM Specialist LLC** Jan 2025 – Jul 2025
Node.js, Express.js, PostgreSQL, ERD Design, APIs
 - Developed and optimized backend services for B2B integrations and automation workflows.
 - Designed efficient data pipelines and ERD-based systems for order processing and business operations.
 - Implemented validation, authentication, and logging mechanisms.
 - Collaborated with cross-functional teams using version control and agile practices.
- Backend Intern – Internee.pk** Sep 2024 – Dec 2024
Node.js, RESTful APIs, PostgreSQL
 - Built and debugged RESTful APIs, reducing response errors by 30%.
 - Assisted in database optimization, improving backend performance by 25%.
 - Streamlined internal tools, accelerating deployment cycles.

PROJECTS

- Final Year Project - Hifazat App** August 2024 - May 2025
Flutter, Django, PostgreSQL, REST APIs, Web Scraping
 - Built a location-based community safety application.
 - Developed secure Django REST APIs with JWT authentication.
 - Implemented role-based access control.
 - Integrated PostgreSQL with PostGIS for geospatial data.
